

## A Different Double Take

This is a registry for MOMs of children with special needs including but not limited to those with medical, emotional, physical or mental limitations and disabilities or serious illness. Some examples are autism, attachment disorder, ADHD, cancers, diabetes, Downs Syndrome, hearing impairment and organ transplant.

The purpose of this is threefold:

- 1) to address different topics relevant to these MOMs in articles,
- 2) to connect MOMs searching for someone to talk with who has been in her situation and those willing to share their experience, and
- 3) to assist researchers in these topics. For the third reason, I ask that you respond to the questionnaire even if you are not interested in contact from others.

Child's diagnosis (list separately if more than one child affected) \_\_\_\_\_
